
This versatile, flexible and complete system delivers the latest lighting technology in a classic design for a wide range of interior styles.

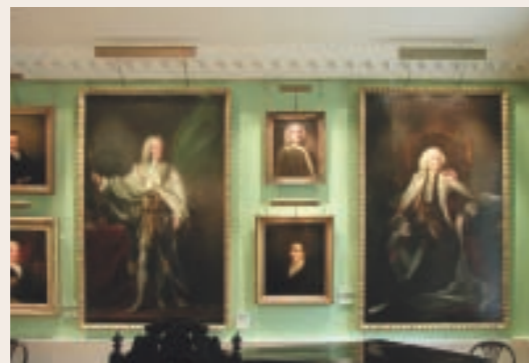

Produced from natural brass, **CX POWERAIL** is simple to install and sympathetic to the fabric of the building, of particular importance for heritage buildings.

- Pictures may be hung at any position along the rail and are individually lit.
- Pictures can easily be moved to any position along the rail and re-lit without the need for any rewiring or structural work.
- Two or more individually lit pictures may be hung from the same hanging chains.
- The museum quality lighting fixtures are mounted on the picture frame.
- Available in a range of sizes, each light can be finely tuned to its picture to maximise viewing pleasure.
- The tungsten halogen light source assures true colour rendition throughout.
- The head of the fixture is removable from the frame for ease of lamp change.

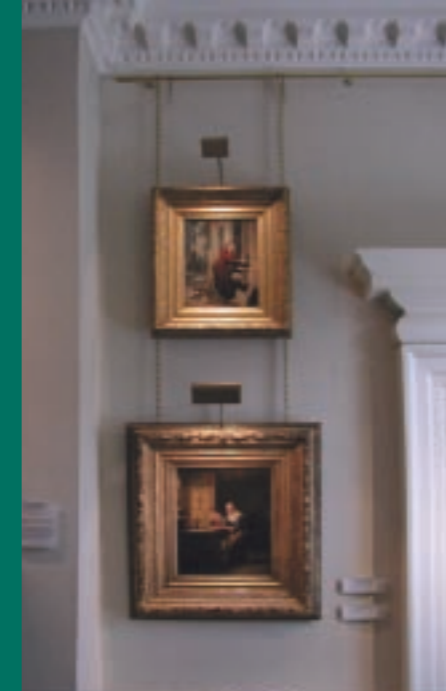

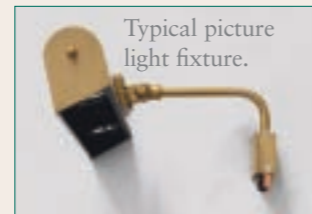

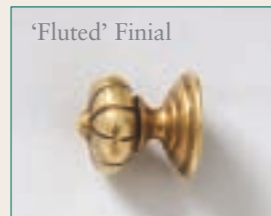

The system is powered by the **CX SUPPLYMASTER**, an 'intelligent' 12V power unit which provides a range of unique features of significant benefit for picture lighting

- Low maintenance, stabilised light levels, extended lamp life and noise free operation within the room.
- Remote mounting at extremely long distances from the **CX POWERAIL** further enhances the flexibility of system.

The **CX POWERAIL SYSTEM** is the optimum solution for hanging and lighting pictures.

CX POWERAIL PICTURE HANGING AND LIGHTING SYSTEM COMPONENTS.

CX POWERAIL

Picture hanging and lighting system

This versatile, flexible and complete system delivers the latest lighting technology in a classic design for a wide range of interior styles.
